On a Windows PC you will see a screen where you can simply drag and drop single or multiple files into the window from your file explorer **or** press the 'Browse Computer' link and add them manually.

On a phone or tablet a similar screen will appear but without the drag and drop option and depending on your device's operating system you may be able to select multiple files or just one at a time.

After you have uploaded your files check they are there by returning to the home page and looking in the 'most recent run' gallery.

If you want these moving to a specific run folder please contact Dave Thistlethwaite via FB or email: dave.thiss@virginmedia.com

He can also give you a temporary link to any folder for direct upload (such as for older runs).
